

Suhani Bharti

Delhi, India | soha91177@gmail.com | [LinkedIn](#) | [GitHub](#)

Profile

B.Tech Computer Science (AI) student skilled in Data Structures & Algorithms, Full Stack Development and Machine Learning. Experienced in building scalable REST APIs using Node.js, developing AI-driven applications and have hands-on exposure to Ethical hacking tools.

Education

GL Bajaj Institute of Technology and Management

2023 – 2027

B.Tech in Computer Science (Artificial Intelligence)

Katalyst India Scholarship & Development Program

Selected for a competitive scholarship program, completing 100+ technical training sessions and 50+ mentor-led sessions focused on engineering excellence and professional growth. Gained direct industry exposure through corporate visits and engagements with Microsoft, Accenture, Fidelity, and FlaktGroup.

Projects

CrowdGuard – AI-Based Real-Time Incident Reporting Platform

[GitHub](#)

- Developed a real-time public safety platform with geolocation-based incident reporting.
- Built backend APIs using Node.js and Express to handle user reports efficiently.
- Implemented AI-based categorization to classify incidents automatically.
- Designed system to manage and track incidents for improved response visibility.

Pathnexus – AI-Powered Career Guidance Platform

[GitHub](#)

- Built an AI-driven platform to evaluate student placement readiness based on skills, resume quality, and academic performance.
- Developed a machine learning-based scoring model to estimate selection probability and identify skill gaps.
- Generated personalized learning roadmaps based on user performance and improvement areas.
- Designed an interactive dashboard using React and Node.js to visualize readiness scores and recommendations.

MindSpace – Secure Anonymous Mental Health Platform

[GitHub](#)

- Developed an anonymous mental health platform enabling users to share thoughts and experiences.
- Applied NLP-based machine learning to analyze user-written text and detect emotional sentiment.
- Built backend APIs using Node.js and Express for handling user data and text processing.
- Ensured structured data handling and implemented input validation for reliability.

Technical Skills

- **Languages:** C++, Python, JavaScript
- **Frontend:** React.js, HTML, CSS, JavaScript
- **Backend:** Node.js, Express.js, RESTful APIs
- **AI/ML:** NLP, Scikit-learn, TensorFlow, LLMs (Langchain), Vector Databases, API Integration
- **Cybersecurity:** Wireshark, Nmap, Burp Suite (PortSwigger), SET ToolKit
- **CS Core:** DSA, OOPS, Operating Systems, SQL, System Design
- **Tools:** Git, GitHub, Linux (Kali, Ubuntu), Postman

Certifications

- The AI Engineer Bootcamp
- Cisco CCNA: Introduction to Networks
- Cisco Introduction to Cybersecurity
- Cisco Python Essentials
- Mastering DSA Using C++
- Modern JavaScript

Achievements

- Finalist at Katathon 5.0 for innovation and technical execution among 100+ teams.
- Solved 150+ problems across Leetcode and other coding platforms.
